**MONTHLY GREEN TARIFF SHARED RENEWABLES PROGRAM**  
**PROGRESS REPORT**

**I.**

**INTRODUCTION**

Pursuant to Ordering Paragraph (“OP”) 10 of California Public Utilities Commission (“Commission”) Decision (“D.”) 15-01-051 (the “Decision”), Southern California Edison Company (“SCE”) respectfully submits its Monthly Green Tariff Shared Renewables (“GTSR”) Program Progress Report (“Monthly Report”) for July 2016.

## II.

### **BACKGROUND**

On September 28, 2013, Governor Brown signed Senate Bill (“SB”) 43 into law.<sup>1</sup> SB 43 enacted the GTSR Program, a 600 MW statewide program that allows participating utilities’ customers—including local governments, businesses, schools, homeowners, municipal customers, and renters—to meet up to 100% of their energy usage with generation from eligible renewable energy resources. As required by SB 43, all of the Investor-Owned Utilities’ (“IOUs”)<sup>2</sup> filed applications with the Commission requesting approval of GTSR programs consistent with the statute.

On January 29, 2015, the Commission adopted D.15-01-051, implementing a GTSR Program framework and approving the IOUs’ applications with modifications. Among other things, the Commission divided the GTSR Program’s statewide limitation of 600 MW of customer participation among the IOUs. SCE’s share of the statewide limitation is 269 MW.

On May 13, 2015, SCE submitted three advice letters: (1) Advice 3219-E, referred to as the Customer Service Implementation Advice Letter (“CSIAL”), which included a proposed rate design methodology in compliance with the requirements of the Decision and included a calculation of GTSR Program rates for 2015; (2) Advice 3220-E, referred to as the Marketing Implementation Advice Letter (“MIAL”); and (3) Advice 3218-E, referred to as the Joint Procurement Implementation Advice Letter (“JPIAL”), which was jointly filed by the IOUs. On October 1, 2015, the Commission adopted Resolution E-4734 (the “Resolution”), which approved the CSIAL and JPIAL, as modified by the Resolution, and adopted SCE’s rate design methodology and 2015 GTSR Program rates as proposed.<sup>3</sup>

The GTSR Program structure approved by the Commission consists of two elements: (1) a green tariff option (called the “Green Rate” by SCE), allowing customers to source a greater share of their energy needs with renewables, and (2) an enhanced community renewables (“ECR”) option (called the

---

<sup>1</sup> SB 43 was codified in Cal. Pub. Util. Code § 2831 *et seq.*

<sup>2</sup> The IOUs include SCE, Pacific Gas and Electric Company, and San Diego Gas & Electric Company.

<sup>3</sup> On October 21, 2015, SCE filed Advice 3218-E-A (JPIAL update), 3219-E-A (CSIAL update), and 3297-E (SCE-specific JPIAL tariffs) to comply with the Resolution.

“Community Renewables Program” by SCE), allowing customers to subscribe to renewable energy from community-based projects.<sup>4</sup>

OP 10 of the Decision directs SCE to file several reports as discussed in Section 8 of the Decision. SCE filed its First Annual GTSR Program Progress Report on March 15, 2016 and its first Monthly Report on March 25, 2016. This Monthly Report covers the following topics for the month of March 2016:<sup>5</sup>

- A. “Available capacity” data at the most detailed level feasible, updated monthly, and work to increase the precision of the information over time.
- B. Summary of monthly advisory group activities, or consultation with CBOs, if any.

Pursuant to the direction in D.15-01-051, SCE respectfully files this Monthly Report.

### III.

#### **REPORT COMPONENTS**

##### **A. Available Capacity**

The Decision requires “available capacity” data at the most detailed level feasible, updated monthly, to be reported with precision of the information increasing over time. Customer demand for SCE's Green Rate program will be met through the Interim Pool, in all or in part, until sufficient Green Rate resources are online.

The Decision sets a target capacity for SCE’s GTSR Program of 269 MW, inclusive of 45 MW reserved for Environmental Justice (EJ) facilities. Table 1 presents the current solar capacity procured specifically for the Green Rate (“GR”) and Community Renewables (“CR”) components of the GTSR Program.

---

<sup>4</sup> See D.15-01-051 at 3-4.

<sup>5</sup> See *id.*, at 140-141.

**TABLE 1: GTSR PROCUREMENT (in MW)**

Category	Target Capacity	GR Procured to Date	CR Procured to Date	GR Online to Date	CR Online to Date	Capacity Remaining
Unrestricted	224	20	-	-	-	204
Reserved for EJ	45	-	-	-	-	45
<b>Total</b>	<b>269</b>	<b>20</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>249</b>

Customer enrollment data for the GTSR Program is presented in Table 2. It provides subscribed capacity for the GR and CR programs.

**TABLE 2: GTSR ENROLLMENT (in MW)**

Category	GR Enrolled Capacity	CR Enrolled Capacity	Total by Type
Residential Customers	.15	-	.15
Non-Residential Customers	.06	-	.06
<b>Total by Program</b>	<b>.21</b>	<b>-</b>	<b>.21</b>

Capacity depicted for July 2016.

## **B. Advisory Network Activities**

SCE has no Advisory Network activities to report for this period. Future activities include an update to the Consumer Advisory Panel to be rescheduled. This update was previously scheduled for July 20, 2016. Additionally, SCE will participate in a number of solar and renewable energy conferences. These include participation in SCE's Water Conference – All Things Renewable in September, and other community presentations regarding SCE's solar options.

**IV.**

**CONCLUSION**

SCE respectfully files the foregoing Monthly Report pursuant to OP 10 of D.15-01-051.

Respectfully submitted,

JANET S. COMBS
